

THE ACTIVIST'S HANDBOOK

By The American Policy Center

**LEARN HOW TO RESTORE FREEDOM, TAKE THE OFFENSIVE, CHANGE THE DEBATE,
AND HOLD ELECTED OFFICIALS RESPONSIBLE.**

Understanding the problem

A limited few oligarchs (the anointed) aim to scientifically manage society for what they perceive to be a better world. **Neofeudalism.**

This goal is not new, it has been around since the beginning of time, and has never been effective at anything other than the destruction of freedom, oppression of the populace, death of millions, and the destruction of economies.

Understanding the foundations

Who are "the anointed"?

We know better than you: the vision of the anointed and their methods

- Identify a problem or something to control (real or not), and make it a crisis
- Identify an approach that demands compliance and sacrifice
- Ignore the failure, blame someone else, and start all over again
- Refuse to measure results

The anointed don't have to abide by their own rules

"It doesn't matter what is true. It only matters what people believe is true". Paul Watson, co-founder of Greenpeace.

Understanding the driving forces

"Better than you" mindset.

Sinful human nature.

The desire for power and control.

Disrespect for others.

Everything will be better if we do it my way.

Understanding the organizational web

Non-Governmental Organizations (NGOs)

World Economic Forum

Charitable Foundations

United Nations

Socialism / Marxism / Communism in all its forms

Understanding the methods

Management through fear and manipulation

Create division and turmoil

Restrict access to create dependency

- To resources

- To food
- To information
- To mobility
- To property
- To wealth

Understanding the plan

The World Economic Forum summarizes the eight predictions in the following statements:

- People will own nothing. Goods are either free of charge or must be lent from the state.
- The United States will no longer be the leading superpower, but a handful of countries will dominate.
- Organs will not be transplanted but printed.
- Meat consumption will be minimized.
- Massive displacement of people will take place with billions of refugees.
- To limit the emission of carbon dioxide, a global price will be set at an exorbitant level.
- People can prepare to go to Mars and start a journey to find alien life.
- Western values will be tested to the breaking point.

"We are on the verge of a global transformation. All we need is the right major crisis, and the nations will accept the New World Order." David Rockefeller at a 1994 UN Dinner

Sustainable development goals: social engineering in all its forms

- End poverty in all its forms everywhere
- End hunger, achieve food security and improve nutrition and promote sustainable agriculture
- Ensure healthy lives and promote well-being of all at all ages.
- Ensure inclusive and equitable quality education and promote lifelong learning opportunities.
- Achieve gender equality and empower all women and girls.
- Ensure availability and sustainable management of water and sanitation.
- Ensure access to affordable, reliable, sustainable and modern energy for all.
- Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.
- Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation.
- Reduce inequality within and among countries.
- Make cities and human settlements inclusive, safe, resilient and sustainable.
- Ensure sustainable consumption and production patterns.
- Take urgent action to combat climate change and its impacts.
- Conserve and sustainable use the oceans, seas and marine resources for sustainable development.
- Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss.
- Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels.
- Strengthen the means of implementation and revitalize the global partnership for sustainable development.

SUSTAINABLE DEVELOPMENT GOALS

What can I do?

Know your enemy

Discern the larger objectives within the smaller actions.

Change the narrative

Convert your message from one of logic and facts to one of personal stories of harm and emotional appeals to stop the attacks on freedom.

"It is usually futile to try to talk facts and analysis to people who are enjoying a sense of moral superiority in their ignorance." Dr. Thomas Sowell

Pick your battles

What actions are needed in your community? What are the issues that are most important?

Take the offense

Develop a team, research your position, plan for action, and then act locally.

Take legislative action

Work to implement legislation that will block sustainable development activities before they start.

Know the players

Learn who has an impact in your local communities and develop relationships that will allow you to access and inform them.
